

Peaceful Smart Home Morning

<https://gemini.google.com/app/2f95e4d02d357ada>

User prompt: A wide 16:9 cinematic masterwork capturing a peaceful 7 AM morning in a realistic 2036 smart home, harmoniously blending domestic warmth with grounded near-future everyday technology. Interior (2nd-Floor Living Space & Open Kitchen): - Foreground (Living Area & Indoor Farm): An elegant East Asian woman in her mid-30s with graceful facial features, warm glowing skin, and a serene smile stands in comfortable homewear, holding a warm steaming ceramic mug. Beside her is a large, multi-tier automated home hydroponic smart-farm cabinet seamlessly built into the living room interior. Through its clear glass panels, lush green basil, lettuce, and fresh herbs thrive under soft full-spectrum LED grow-lights, with automated micro-misting tubes and silent nutrient-delivery systems running quietly—a fully normalized everyday home appliance. - Midground (Open Kitchen): A friendly, sleek matte-white domestic assistant robot with soft organic curves quietly places clean ceramic dishes into an open natural oak cabinet. Neatly mounted beneath the upper wooden kitchen shelf is a slim, integrated smart touchscreen displaying the daily family schedule, home automation status, and nutrition data, naturally blending into the kitchen furniture without intrusive glowing holograms. Window View (Spacious 2-Lane Residential Street Viewed from 2nd Floor): - Across the Street (Villas): A realistic, lived-in 5-story red-brick villa stands bathed in early golden morning sunlight. Stainless-steel clotheslines hang outside third-floor balconies with freshly washed laundry gently fluttering in the morning breeze; a few scattered windows have warm interior lights turned on while others remain quiet; 1st-floor open pilotis parking spaces show compact electric commuter cars plugged into slim wall-mounted charging stations. - Roadway Division & Traffic Rules: The wide two-lane asphalt street is clearly divided down the center by a distinct dashed orange center dividing line (broken orange centerline). Traffic strictly adheres to right-hand traffic laws, with vehicles properly positioned in their own separate lanes without encroaching. - Near Curbside Lane (School Bus Routine): In the right-hand lane closest to the apartment sidewalk, a classic bright yellow electric autonomous school bus (driverless cabin, modern rounded body) is safely stopped along the curb. On the wide pedestrian sidewalk, a young East Asian student wearing a backpack turns towards the bus with anticipation, while an adult escort teacher in a clean uniform stands on the sidewalk warmly greeting and safely guiding the child aboard. - Opposite Lane (Oncoming Autonomous Car): Across the dashed orange center line, in the opposite left-hand traffic lane traveling safely in the oncoming direction, a sleek autonomous passenger sedan cruises smoothly within its own lane. Through its clear windshield, the driver's seat is visibly empty with no steering wheel, while a relaxed passenger sits back peacefully browsing a tablet, illustrating a completely normalized, collision-free autonomous driving ecosystem. Lighting & Atmosphere: - Soft golden-hour 7 AM morning sunlight

streaming through automatically opened smart blinds, casting long warm shadows across natural oak floors and linen curtains. - Grounded, authentic, lived-in atmosphere highlighting the balance between advanced robotics, effortless mobility, and human emotional warmth—completely free of cold sci-fi or cyberpunk tropes. - Hyper-detailed photorealistic concept art, cinematic 8k resolution, authentic material textures (wood grain, red brick mortar, ceramic glaze, fabric folds, morning mist). --ar 16:9

User prompt: 창 밖의 아이를 바라보고있게 해줘

User prompt: A wide 16:9 cinematic masterwork of a peaceful 7 AM morning in a realistic 2036 smart home, capturing domestic warmth and grounded near-future technology. Interior (2nd-Floor Living Space & Kitchen): - Foreground: A beautiful East Asian woman in her mid-

30s in comfortable homewear holds a steaming ceramic mug beside a large, multi-tier automated hydroponic smart-farm cabinet with lush basil and full-spectrum LED lights. Standing near the window, she looks tenderly down toward the street, keeping her warm maternal gaze fixed on her child below until boarding is complete. - Midground: A sleek matte-white domestic robot places clean dishes into an oak cupboard. Mounted cleanly under the upper shelf, a slim integrated touchscreen displays the family schedule and nutrition routines. Window View (2-Lane Residential Street Viewed from 2nd Floor): - Across the Street: A 5-story red-brick villa with laundry fluttering on 3rd-floor balconies, scattered warm window lights, and electric cars charging in the 1st-floor pilotis parking. - Roadway & Autonomous Traffic: A spacious two-lane road divided by a dashed orange center line, strictly adhering to right-hand traffic. In the opposite oncoming lane, an autonomous sedan travels safely; through its clear windshield, the driver's seat is completely empty while the passenger relaxes with a tablet. - Sidewalk & Full School Bus View: In the near curbside lane, the classic bright yellow electric autonomous school bus is shown in full view from front to rear bumper. Its wide front windshield clearly reveals an empty driverless cockpit with zero human driver. On the sidewalk, a uniformed escort teacher stands outside welcoming the student, while the young East Asian student turns back, looking directly up at the 2nd-floor window and waving happily goodbye to the mother. Lighting & Style: - Warm golden 7 AM morning sunlight through smart blinds, natural textures of oak wood, brick, and ceramic glaze, photorealistic concept art, cinematic depth of field. --ar 16:9

User prompt: A wide 16:9 cinematic masterwork capturing a peaceful 7 AM morning in a realistic 2036 smart home, harmoniously blending domestic warmth with grounded near-future everyday technology. Camera & Framing: - Elevated wide-angle view from a 2nd-floor apartment, perfectly capturing both the warm interior foreground and the streetscape below. Wide exterior framing ensures the entire school bus is 100% visible and uncropped within the

window frame. Interior (2nd-Floor Living Space & Open Kitchen): - Foreground (Living Area & Indoor Farm): An elegant East Asian woman in her mid-30s with graceful features, warm glowing skin, and a serene smile stands in comfortable homewear holding a steaming ceramic mug. Beside her stands a large multi-tier automated home hydroponic smart-farm cabinet built into the living room interior, growing lush basil, lettuce, and herbs under soft full-spectrum LED grow-lights with quiet micro-misting tubes. Standing near the window, she looks tenderly down toward the street, keeping her warm maternal gaze fixed on her child below. - Midground (Open Kitchen): A friendly, sleek matte-white domestic assistant robot quietly places clean ceramic dishes into an open natural oak cabinet. Neatly mounted beneath the upper wooden kitchen shelf is a slim, integrated smart touchscreen displaying daily schedules and nutrition data, naturally blending into the furniture without floating holograms. Window View (Spacious 2-Lane Residential Street Viewed from 2nd Floor): - Across the Street (Villas): A realistic 5-story red-brick villa in early golden morning sunlight, with clotheslines on third-floor balconies fluttering laundry, scattered glowing windows, and electric cars charging under the 1st-floor pilotis parking. - Roadway Division & Traffic Rules: The wide two-lane asphalt street is clearly divided down the center by a distinct dashed orange center line, strictly adhering to right-hand traffic laws. - Opposite Lane (Oncoming Autonomous Car): In the oncoming lane across the dashed orange line, a sleek autonomous passenger sedan cruises safely. Through its windshield, the driver's seat is completely empty with no steering wheel, while a relaxed passenger sits back browsing a tablet. - Sidewalk & School Bus (Entire Vehicle Fully Visible): In the near curbside lane, the classic bright yellow electric autonomous school bus is fully framed from front bumper to rear bumper, 100% visible end-to-end without any cropping. Its wide clear windshield visibly confirms an empty, driverless cockpit. On the wide sidewalk, a uniformed adult escort teacher stands outside warmly greeting the student, while the young East Asian student turns back, looking up at the 2nd-floor window and waving happily goodbye to the mother. Lighting & Style: - Warm golden 7 AM sunrise streaming through smart blinds, natural textures of oak wood, brick mortar, and ceramics, photorealistic concept art, cinematic 8k resolution, authentic depth of field. --ar 16:9

User prompt: 차 방향을 반대로 바꿔줘

User prompt: A wide 16:9 cinematic masterwork capturing a peaceful 7 AM morning in a realistic 2036 smart home, harmoniously blending domestic warmth, hyper-personalized wellness, and grounded near-future everyday technology. Camera & Framing: - Elevated wide-angle view from an open 2nd-floor apartment living room, capturing both the detailed warm interior foreground and the spacious streetscape below through a broad window. Wide exterior framing ensures the entire school bus is 100% visible end-to-end without any cropping. Interior (2nd-Floor Living Space & Open Kitchen): - Foreground (Mother & Personalized Wellness): An elegant East Asian woman in her mid-30s with graceful facial features, warm glowing skin, and a serene smile stands in comfortable stylish homewear near the window. She holds a warm steaming ceramic mug designed with an ultra-thin, flush e-ink

display band that softly indicates her personalized bio-synced morning hydration and nutrient balance (analyzed from overnight sleep vitals). - Beside her stands a large, multi-tier automated home hydroponic smart-farm cabinet seamlessly built into the living room interior, growing lush basil, lettuce, and fresh herbs under soft full-spectrum LED grow-lights with quiet micro-misting tubes and automated nutrient feeds—a fully normalized household appliance. Standing by the window, she looks tenderly down toward the street, keeping her warm maternal gaze fixed on her child below. - Midground (Open Kitchen): A friendly, sleek matte-white domestic assistant robot with soft organic curves quietly places clean ceramic dishes into an open natural oak cabinet. Neatly mounted beneath the upper wooden kitchen shelf is a slim, integrated smart touchscreen displaying the daily family schedule, meal sync, and home automation routines, blending naturally into the cabinetry without glowing holograms. Window View (Spacious 2-Lane Residential Street Viewed from 2nd Floor): - Across the Street (Villas): A realistic, lived-in 5-story red-brick villa in early golden morning sunlight. Stainless-steel clotheslines on third-floor balconies flutter freshly washed laundry in the morning breeze; a few scattered windows have warm indoor lights turned on while others remain quiet; 1st-floor open pilotis parking spaces show compact electric commuter cars plugged into slim wall-mounted chargers. - Roadway Division & Strict Right-Hand Traffic: A wide two-lane asphalt street is clearly divided by a distinct dashed orange center line (broken orange dividing line). Traffic strictly complies with the right-hand traffic system (vehicles drive exclusively on the right side of the road, standard continental traffic rules, strictly no left-hand driving). - Curbside Right Lane (School Bus & Goodbye Interaction): In the right-hand lane closest to the sidewalk, a classic bright yellow electric autonomous school bus is fully framed from front bumper to rear bumper, 100% visible without any cropping. Its broad clear front windshield confirms a completely empty, driverless cockpit. On the wide sidewalk, a uniformed adult escort teacher stands outside warmly welcoming the student, while the young East Asian student turns around, looking up at the 2nd-floor window and waving happily goodbye to the mother. - Opposite Oncoming Lane (Facing Autonomous Sedan): In the opposing traffic lane across the dashed orange line, moving smoothly forward in its own correct right lane, a sleek autonomous passenger sedan cruises past. Through its clear windshield, the driver's seat is visibly unoccupied with no steering wheel, while a relaxed passenger sits back browsing a tablet, illustrating a fully normalized, collision-free autonomous driving environment. Lighting & Style: - Warm golden-hour 7 AM morning sunlight streaming through automatically opened smart blinds, casting long soft shadows on natural oak flooring and linen curtains. - Grounded, lived-in atmosphere celebrating the balance between advanced robotics, personalized biotechnology, and human emotional warmth—completely free of cold sci-fi or cyberpunk tropes. - Hyper-detailed photorealistic concept art, cinematic 8k resolution, authentic material textures (wood grain, red brick mortar, smooth ceramic glaze, soft morning air). --ar 16:9

User prompt: A wide 16:9 cinematic masterwork capturing a peaceful 7 AM morning in a realistic 2036 smart home, harmoniously blending domestic warmth, hyper-personalized wellness, and grounded near-future everyday technology. Camera & Framing: - Elevated wide-angle view from an open 2nd-floor apartment living room, perfectly capturing both the warm interior foreground and the broad streetscape below through a wide window. Wide exterior framing ensures the entire school bus is 100% visible end-to-end without any cropping. Interior (2nd-Floor Living Space & Open Kitchen): - Foreground (Mother & Personalized Mug Reading): An elegant East Asian woman in her mid-30s with graceful facial features, glowing skin, and a serene smile stands in comfortable, stylish homewear near the window. She gently raises a warm steaming ceramic mug close to her chest with both hands, looking down attentively to read the personalized bio-synced nutrition and hydration balance softly displayed on the mug's ultra-thin, flush e-ink band (formulated from her overnight sleep data). - Beside her stands a large, multi-tier automated home hydroponic smart-farm cabinet seamlessly built into the living room interior, growing lush basil, lettuce, and fresh herbs under soft full-spectrum LED grow-lights with quiet micro-misting tubes and automated nutrient feeds—a fully normalized everyday household appliance. - Midground (Open Kitchen): A friendly, sleek matte-white domestic assistant robot with soft organic curves quietly places clean ceramic dishes into an open natural oak cabinet. Neatly mounted beneath the upper wooden kitchen shelf is a slim, integrated smart touchscreen displaying the daily family schedule, meal synchronization, and home automation routines, naturally blending into the furniture without glowing holograms. Window View (Spacious 4-Lane Residential Avenue Viewed from 2nd Floor): - Across the Street (Villas): A realistic, lived-in 5-story red-brick villa in early golden morning sunlight. Stainless-steel clotheslines on third-floor balconies flutter freshly washed laundry in the morning breeze; a few scattered windows have warm indoor lights turned on while others remain quiet; 1st-floor open pilotis

parking spaces show compact electric commuter cars plugged into slim wall-mounted chargers. - Roadway Division & Strict Right-Hand Traffic: A wide, spacious four-lane asphalt avenue (two lanes in each direction) is clearly divided down the center by a distinct dashed orange center line (broken orange dividing line). Traffic strictly complies with the right-hand traffic system across all lanes without any lane encroachment. - Curbside Right Lanes (Full School Bus & Child's Wave): In the outermost right-hand curbside lane next to the wide pedestrian sidewalk, the classic bright yellow electric autonomous school bus is fully framed from front bumper to rear bumper, 100% visible without any cropping. Its broad clear windshield confirms a completely empty, driverless cockpit. On the sidewalk, an adult escort teacher in a clean uniform stands outside warmly guiding the child, while the young East Asian student turns back, looking up at the 2nd-floor window and waving happily goodbye toward the home. - Opposite Oncoming Lanes (Facing Autonomous Car): In the oncoming traffic lanes across the dashed orange center line, moving forward in its correct lane, a sleek autonomous passenger sedan cruises smoothly. Through its clear windshield, the driver's seat is visibly unoccupied with no steering wheel, while a relaxed passenger sits back comfortably browsing a tablet, demonstrating an effortless, collision-free autonomous driving ecosystem. Lighting & Style: - Soft golden-hour 7 AM morning sunlight streaming through automatically opened smart blinds, casting long warm shadows across natural oak flooring and linen curtains. - Grounded, lived-in atmosphere celebrating the balance between advanced robotics, personalized biotechnology, and human emotional warmth—completely free of cold sci-fi or cyberpunk tropes. - Hyper-detailed photorealistic concept art, cinematic 8k resolution, authentic material textures (wood grain, red brick mortar, smooth ceramic glaze, soft morning air). --ar 16:9

User prompt: A wide 16:9 cinematic masterwork of a peaceful 7 AM morning in a 2036 smart home, showing domestic warmth, hyper-personalized wellness, and grounded near-future

technology. Camera & Perspective: - Elevated wide-angle view from a 2nd-floor apartment window overlooking a spacious 4-lane residential avenue below. Wide exterior framing ensures the entire school bus is 100% visible end-to-end without cropping. Interior (Foreground & Kitchen): - Foreground: An elegant East Asian woman in her mid-30s in stylish homewear gently raises a warm steaming ceramic mug near her chest, looking down attentively to read personalized bio-synced nutrient and hydration balance shown on an ultra-thin flush e-ink band. Beside her is a large, multi-tier automated hydroponic smart-farm cabinet with lush basil and herbs under full-spectrum LED grow-lights and micro-misting tubes. - Midground: A sleek matte-white domestic robot places clean dishes into an oak cupboard. Mounted beneath the shelf is a slim, integrated smart touchscreen displaying daily routines and meal sync without floating holograms. Window View (Strict Right-Hand Traffic 4-Lane Avenue): - Roadway Layout & Traffic Rules: Wide 4-lane avenue divided by a dashed orange center line. Strict right-hand traffic (RHT) rules strictly enforced; all vehicles drive exclusively on the right side of the road. - Curbside Right Lanes (School Bus Routine): Positioned strictly in the right-hand lane against the right-side pedestrian sidewalk, a classic bright yellow electric autonomous school bus is parked with its passenger door facing the sidewalk. The entire bus is 100% visible from front to rear bumper with no cropping, and its windshield confirms an empty driverless cockpit. On the sidewalk, a uniformed escort teacher guides the boarding while a young East Asian student turns back, looking up at the 2nd-floor window and waving goodbye to the mother. - Opposite Lanes (Oncoming Traffic): Across the dashed orange center line, in the opposite travel lanes, an autonomous passenger sedan drives smoothly in its own lane. Its clear windshield shows an unoccupied driver's seat while a passenger relaxes with a tablet. - Across the Street: A 5-story red-brick villa with laundry fluttering on 3rd-floor balconies, scattered warm window lights, and electric cars charging under 1st-floor pilotis parking. Lighting & Style: - Warm golden 7 AM morning sunlight through smart blinds, natural oak wood and red brick textures, photorealistic concept art, cinematic 8k resolution. --ar 16:9 Negative Prompt: left-hand traffic, driving on the left side of the road, UK traffic layout, cropped bus, missing bumper, empty sidewalk, floating holograms, cyberpunk neon, distorted anatomy.

User prompt: A wide 16:9 cinematic view capturing a peaceful 7 AM morning in a realistic 2036 smart home, showing domestic warmth, personal wellness, and grounded near-future technology. Interior (Foreground & Kitchen): - Foreground: An elegant East Asian woman in her mid-30s in homewear holds a warm ceramic mug showing personal bio-data on an e-ink band. Standing by the window, she turns her head to look down tenderly through the glass, keeping her affectionate gaze on her child outside. - Indoor Smart Farm: Beside her, a multi-tier automated hydroponic cabinet cultivates fresh basil and herbs under LED lights. A sleek, integrated OLED status display on the glass frame clearly shows plant health metrics, nutrient levels, and harvest timelines. - Midground: A matte-white domestic robot puts away dishes into oak cabinets beneath a slim, wall-mounted schedule touchscreen. Window View (Spacious 4-Lane Avenue, Strict Right-Hand Traffic): - Roadway: A wide four-lane road divided by a dashed orange center line, strictly following right-hand traffic. Across the center line, an autonomous sedan travels in its own lane with an empty driver's seat while a passenger relaxes with a tablet. - Korean-Style School Bus: In the curbside lane against the sidewalk, an uncropped, fully visible Korean-style electric school minibus (flat-front cab-over design, bright school-bus yellow, modern aerodynamic body) is parked at the curb. Its large front glass visibly confirms a completely empty front cabin—strictly driverless with no human driver inside. - Sidewalk Interaction: An escort teacher in uniform stands on the sidewalk guiding boarding. A young East Asian student with a backpack looks up toward the 2nd-floor window, waving goodbye back to the mother. - Background Architecture: Across the street stands a 5-story red-brick villa with laundry on 3rd-floor balconies, pilotis parking with charging electric cars, and soft morning lights in scattered windows. Lighting & Style: - Warm golden 7 AM morning sun streaming through open smart blinds, natural oak and brick textures, photorealistic concept art, cinematic 8k. --ar 16:9 Negative Prompt: American

conventional long-hood school bus, driver behind the steering wheel, driver sitting in bus, left-hand traffic, cropped bus, floating holograms, cyberpunk neon.

User prompt: A wide 16:9 cinematic view of a peaceful 7 AM morning in a realistic 2036 smart home. Interior (2nd-Floor Living Space & Kitchen): - Foreground (Mother's Pose & Gaze): An elegant East Asian woman in her mid-30s in stylish homewear stands beside the window, holding a warm ceramic mug with an e-ink health band. Her head is turned sharply toward the window glass in clear profile, completely turned away from the camera, looking down affectionately at her child on the street below. - Indoor Smart Farm: Beside her, a multi-tier automated hydroponic cabinet cultivates fresh basil and herbs under LED lights, with an integrated slim OLED frame display showing plant vitals and nutrient metrics. - Kitchen: A matte-white domestic robot places clean dishes into oak cupboards beneath a flush-mounted wall touchscreen showing daily routines. Window View (Spacious 4-Lane Avenue, Strict Right-Hand Traffic): - Curbside Lane & Sidewalk: In the rightmost curbside lane, an uncropped, fully visible Korean-style electric school minibus (flat-front cab-over design, bright yellow body) is parked at the curb. Its clear windshield reveals a completely vacant cockpit with no driver. On the sidewalk, an escort teacher in uniform guides boarding while the East Asian student looks up toward the 2nd-floor window, waving goodbye. - Roadway: A wide four-lane road divided by a dashed orange center line, strictly adhering to right-hand traffic. Across the center line, an oncoming autonomous sedan travels with an empty driver's seat while a passenger relaxes with a tablet. - Background: A 5-story red-brick villa with fluttering balcony laundry, 1st-floor pilotis EV charging, and scattered morning window lights. Lighting & Style: - Warm golden 7 AM morning sunlight, natural textures of oak and brick, photorealistic concept art, cinematic depth of field. --ar 16:9 Negative Prompt: facing camera, looking at viewer, frontal face, head facing forward, looking at mug, driver inside bus, driver

behind steering wheel, American long-hood school bus, left-hand traffic, cropped bus, floating holograms, cyberpunk neon.
